Figure 1 is a line graph showing the effect of the concentration of the inhibitor on the rate of polymerization. The y-axis is labeled "Rate of polymerization" and ranges from 0 to 1.0. The x-axis is labeled "Concentration of inhibitor" and ranges from 0 to 1.0. The curve starts at (0, 1.0) and decreases as the concentration of inhibitor increases, approaching zero as the concentration approaches 1.0. The curve is labeled "P-100".

A collage of three images. The top image is a portrait of a woman with dark hair, wearing a dark jacket, looking slightly to the right. The bottom-left image shows a large, light-colored building with a prominent central tower or dome, possibly a government or institutional building. The bottom-right image shows a group of people, possibly a family, standing together outdoors.

The collage consists of several overlapping and partially visible advertisements. At the top, there are logos for 'Lexus of America' and 'Lexus of America, Inc.'. Below these, there are various text-based ads, some of which are partially obscured by other images. A prominent ad for 'Water Mark' is visible in the lower right section. The overall aesthetic is that of a collection of vintage print advertisements from the 1980s.
